

ABBOTT'S FREESTYLE LIBRE 2 TECHNOLOGY: INNOVATION THAT'S ACCESSIBLE

LIVING WITH DIABETES IS EXPENSIVE

\$10,000
AVERAGE COST PER YEAR¹

2 OUT OF 5
CAN'T AFFORD IT²

1 IN 4
SKIP INSULIN DOSES DUE TO COSTS³

1 IN 6
CHOOSE TO BUY FOOD OVER TREATMENT⁴

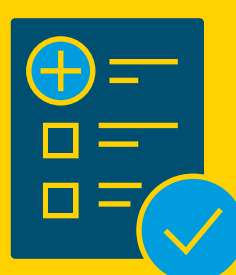

AND THE U.S. HEALTHCARE SYSTEM IS COMPLEX

Multiple stakeholders are involved in the delivery of diabetes products.

Medical cost burdens are shifting to consumers through fast-growing, high-deductible or coinsurance plans.⁵

The way medical device products are priced has a profound impact on the overall health system and most importantly, consumers.

Because of this trend, low list prices for diabetes technologies can mean low out-of-pocket costs so people can leave the pharmacy with their prescriptions filled.

AFFORDABLE AND ACCURATE TECHNOLOGY TO BETTER MANAGE DIABETES

Today, people can better manage their diabetes with cutting-edge tools like **Abbott's FreeStyle Libre[®] 2 system, a revolutionary integrated continuous glucose monitoring (iCGM) technology designed with accuracy, access and affordability**, differentiating it from other CGMs. Nearly 3 million people use FreeStyle Libre in over 50 countries.⁶

ABBOTT'S APPROACH IS TO MAKE OUR CGM TECHNOLOGY WIDELY ACCESSIBLE SO MORE PEOPLE WITH DIABETES CAN BENEFIT

BEST-IN-CLASS FEATURES AT SAME AFFORDABLE PRICE

Compared to previous versions of the FreeStyle Libre portfolio.

Priced **70% LESS⁷** than other CGMs, which means **lower out-of-pocket costs**

Only iCGM that measures glucose **EVERY MINUTE** with **unsurpassed 14-day accuracy⁸**

Easiest iCGM to apply⁹, optional REAL-TIME ALARMS for adults and children

LONGEST-LASTING¹⁰, self-applied iCGM sensor with up to 14 days of wear

LOWER PATIENT OUT-OF-POCKET (OOP) COSTS

FreeStyle Libre 2 users pay as little as **\$0** per month in out-of-pocket costs¹¹

2 OUT OF 5 patients starting on other CGMs are asked to pay more than \$150 at retail pharmacies¹²

Other CGMs are up to **4x** more likely to be abandoned at retail pharmacies vs. FreeStyle Libre systems¹³

Due to Abbott's unique pricing approach, the world-leading FreeStyle Libre technology is significantly less expensive than other CGMs – enabling access for millions of people living with diabetes to better manage their health.

INDICATIONS AND IMPORTANT SAFETY INFORMATION

The FreeStyle Libre 2 Flash Glucose Monitoring System is a continuous glucose monitoring (CGM) device with real time alarms capability indicated for the management of diabetes in persons age 4 and older.*

WARNINGS/LIMITATIONS

The System must not be used with automated insulin dosing (AID) systems, including closed loop and insulin suspend systems. Remove the sensor before MRI, CT scan, X-ray, or diathermy treatment. Do not take high doses of vitamin C (more than 500 mg per day), as this may falsely raise your Sensor readings. Failure to use the System according to the instructions for use may result in missing a severe low blood glucose or high blood glucose event and/or making a treatment decision that may result in injury. If glucose alarms and readings from the System do not match symptoms or expectations, use a fingerstick blood glucose value to make diabetes treatment decisions. Seek medical attention when appropriate and contact Abbott Toll Free (855-632-8658) or visit [*www.freestylelibre.us](https://www.freestylelibre.us) for detailed indications for use and safety information.
